

## NJP-3000B /3800B Automatic Capsule Filling Machine (Groove Wheel, Push-button, touch Screen)

### Feature:

1. Improves the module turntable the internal structure, Using the Japan imported linear bearing, ensure equipment's accuracy and service life.
2. Main transmission shafts bearing block can splits, easy for maintainer and fix. Groove wheel dividing mechanism, accurate indexing, long service life.
3. All drive cam is using high quality material to made into indentations cam, resist abrasion, steading working, long service life.
4. High-precision drive system is stable and reliable
5. Electronic control system using Japan mitsubishi inverter driving, stepless speed regulation Japan mitsubishi PLC program control, accurate action. Safe and reliable, at the same time having feeding, automatic feeding two functions optional.

### Technical Parameter

Model	NJP-3000B	NJP-3800B
Production efficiency	3000 caps/M	3800 caps/M
	180,000 caps/H	228,000 caps/H
Hole number	23	28
Index table	12 partition seal type	
Capsule size	00# 0# 1# 2# 3# 4#5#	
Capsule size for pellet	0# 1# 2# 3# 4#	
Total power	6.27kw	
Weight formain machine	2000KG	2300KG
Dimension main machine	1365×1185×2027mm	
Vacuum pump	1.5kw water ring pump
