

ZTCF-25 Automatic Bagging Machine for Flour Packing Machine

Automatic 20-50kg bag filling weighing packaging machine is one kind of automatic rational weighing filling bagging equipment. It is mainly designed and developed by our own team for all kinds of fertilizer, rice, sugar, salt, starch etc weighing, filling and packaging.

With bag edge flanging device, it can fold the bag edge so as to meet the no leakages bagging demand on the fertilizer and powder industry.

Application

Scope of application: all kinds of powder, granular material.

- Food: sugar, rice, grain
- Feed and seed: animal feed, seeds, etc.
- Growing media: compost, peat moss, soils, mulch, etc.
- Forestry: bark, wood pellets, paper pellets, etc.
- Chemical: cat litter, fertilizer, plastic pellets, etc.
- Mineral: coal, concrete mix, gravel, salt, sand, etc.

Technical Data

MODEL	ZTCF-25
Packaging Material	paper bag, woven bag (lined with PP/PE film)
	plastic bag (film thickness 0.2mm)
Bag Size	(900-1100mm)*(440-550mm)
Speed	5 bags/min(also depend on packaging material)
Packing Range	10-50kg
Power	3kw, 380v±10%, 50Hz
Air Source	compressed air 0.5-0.7 Mpa
Machine Size	5860*2500*4140mm
Packaging Material	non-sticky powder material
