

XP-1 Bottle Washing Machine

Use clean air or water to clean the bottle automatically before filling.

- Used to variety of bottles.
- Cyclotron structure to avoid bottle contamination.
- Infinitely speed change, private servo synchronization control, Adopt star wheel structure of the bottle input and output position, run smoothly.
- With inverted bottle, anti-bottle automatic detection and elimination function, to ensure no unqualified bottles go into downstream working step.
- High washing speed can ensure high speed bottling line to supply bottles.

Parameter Information

Model	XP-1
Capacity	40-150 Bottles per minute
Gas consumption	0.3m ³ /min
Voltage and power	220V/50HZ 4kw
The compressed air	0.6 Mpa
Main material of equipment	SS304
Control system	MCU
Size	2400×850×1450mm
