

## *GPK-40D Automatic Box Opening Machine*

The automatic box opening machine GPK-40D is a product independently developed and designed by our company. The vertical box opening speed can reach 12 boxes/minute. Compared with the vertical box opening machine of the same level, the price is 50% lower, and it is economical.

**Application industry:** This box opener has been widely used in food, medicine, beverage, tobacco, daily chemical, electronics and other industries.

1. Imported accessories: Use durable parts, electrical components and pneumatic components;
2. It can be used as a supporting device, which can be used in a stand-alone operation or with an automated packaging line;
3. Save man-hours. Vertical storage of cardboard, which can be refilled at any time without stopping the machine;
4. Save labor: The packaging of goods is done by machines instead of labor;
5. Improve efficiency. The rational design of the bottom sealing machine, synchronous absorption and forming, the folding bottom and the bottom cover are simultaneously formed at one time, the speed of unpacking the box is stable, and the efficiency is higher;
6. More safety Add a transparent plexiglass protective cover, and the door will automatically stop when opening the door to avoid accidental operation.

## Specification

Name	Parameter
Carton range	length: 450~250mm×width: 400~150mm×height: 400~100mm
Speed	10-12 boxes/min
Voltage	110/220V, 50/60Hz, 1 Phase
Power	200W
Compressed air	0.6Mpa
Tape size	48、60、72mm
Machine size	Length: 2000mm Width: 1900mm Height: 1452mm
Weight	350Kg
