

UN-580ZS Horizontal Wrapper Equipment

The UN-580ZS Horizontal Wrapper Equipment is specially designed for solid products such as hamburgers, instant noodles, bread, and more.

UN-580ZS Horizontal Wrapper Equipment series flow pack wrapping equipment is a high efficiency and multi-functional horizontal flow pack wrapper. The packing method of low film packing is suitable for the packaging of piece parts, goods with water and irregular products.

Feature

- Suitable for the packaging of large irregular products.
- Low film packing machines. The film covers the products from bottom to the top, this packing method can prevent water from leaking out from the pack bag and avoid the small and loose parts from falling.
- The low film packing machines has better air tightness. It can avoid the appearance of tearing and air leakage.
- Equipped with automatic inspection device. The length of packing bag can be adjusted in the packaging process.
- Equipped with rotating cutting head. The cutting operation and packaging operation proceed simultaneously, which improve production efficiency obviously.
- Angle folder to make the appearance of the packaged product more beautiful.
- Human-machine interface. Easy to operate.

Main Specification

Production capacity	10-45Pcs/min(Single knife)	20-90Pcs/min(double knife)	
Shaped packaging	Various shapes		
Range of packaging	Bag length	240-600mm	130-280mm
	Width	80-200mm	80-200mm
	Height	< 110mm	< 80mm
Maximum width of packing film	600mm		
Maximum diameter of packaging film	Φ300mm		
Total power	3.3kw		
Power supply	220v50-60HZ		
Total weight	900kg		
Dimensions	1800-4100*1300*1450mm
