

## SMT-A Adhesive Label Wrap-Around Machine

Automatic labeling machine for the application of labels on round bottle. The machine is composed by a conveyor, one of label adaptor and one of label applicator. In case of wrap around label application a side conveyor is installed. There is also the possibility to install a hot stamping unit, print expiry date, batch code etc. The bottle loading/unloading can be done manually, through loading/unloading turntable (alternative &Oslash;620mm or &Oslash;900mm) or directly from an production line.

### Technical Features:

Kind of bottle	Round
Bottle size	Min. &Oslash;20mm Max. &Oslash;120mm
Speed	Step motor SMT-A: 15m/min
	Servo motor SMT-B: 25m/min
Label size	Length: 30~200mm Width: 20~90mm
Label roll size	Internal dia. &Oslash; 76mm External dia. &Oslash; 300mm
Power	220V 50/60Hz 1.0kw
Machine size mm	Length 2000, width 900, height 1500
Machine weight	400kgs
