

UN-630ZS Series Wrapping Equipment

The UN-630ZS series wrapping equipment are designed for the packaging of large products such as hamburgers, instant noodles, household products, medical products, and more.

The UN-630ZS series wrapping equipment is a kind of rotating horizontal flow pack wrapping machine, or rather, it is a HFFS wrapper for flow packing lines. The maximum width of the packaging film can reach 450-600mm.

The packaging method of the UN-630ZS series wrapping equipment is up film packing. The automatic film gusseting device can reduce the replace film time by operators and empty machine time.

The UN-630ZS series wrapping equipment is made of stainless steel so that it is compatible with food packaging. This material can present better hygienic conditions when packing food. Moreover, compared with other types, the UN-630ZS series wrapping equipment has more stable operation, higher yield and long service life of 30 years.

Feature

- It is suitable for packing large products.
- Equipped with rotating cutting head, this machine has the advantages of fast cutting speed and high packaging efficiency.
- Heavy machine body, stable operation and high productivity

Main Specification

Max. Production Capacity	15-80 bag/min(Rotary end seal)	
Max Width of Film	630mm	
Max. Dia of Film	Ø350mm	
Packing Range	Length	180~400mm
	Width	125~250mm
	Height	10~60mm
Gross Power	4 Kw	
Power Supply	220V 50Hz	
Overall Dimension	4000×1250×1500mm	
Gross Weight	950KG
