

High Efficiency and Professional Carton Box Unpacking Machine YP-09

It is suitable for automatic open the case or carton. put box into the storage box frame, press the start button, automatic storage box frame start to suction box, folding front cover, fold cover, automatic push bag device by the conveyor belt into the seal box once completed, without artificial participation. Can be use to whole production line from case erecting, case loading and case sealing.

Main characteristics & Structure features

1. The machine structure is simple, easy to operate, easy to maintain, widely used in all walks of life.
2. The standard model is carbon steel polished silver, can be customized according to customer requirements.
3. Complete machine with manipulator high degree of automation, reduce manual
4. Low noise, smooth operation, no damage to carton
5. The tank house is designed as an inclined non-power tank house, with a maximum capacity of 75 boxes. Optionally, the power tank house (with a maximum capacity of 120 boxes) can be supplied at any time without stopping the machine.
6. Seamless butt joint can be achieved with front and rear end devices.

Specification

Case erector model	YP-09
Speed	15≤18 cases/min
Case size	L200-500 W 200-400 H 120-350mm
Size	L 2460* W2080* H1492 mm
Height	600+50 (mm)
Power supply	200W
Gummed paper	48/60/75mm*900code/L OPP
Voltage	220V 50HZ
