

Fully Automatic Labeling Machine (for boxes) HL-T-301B

Dedicated to the thinner, lighter card products, we have achieved the integration of dividing cards, automatic labeling, and automatic card collection with the application of suction technology and suction belt conveyor that preventing deviation in the process of conveying, and improving labeling accuracy. such as: scratching cards, PE Bags, boxes, advertising color pages and other labeling.

Technical Parameter:

Model	HL-T-301B	
Labeling Accuracy	±1mm	
Labeling Speed	80-110pcs/min	
Applicable Dimensions	Length	40mm-400mm
	Width	40mm-80mm
	Height	0.2mm-2mm
Applicable Labe Size	Length	6mm-250mm
	Width	10mm-70mm
Power Supply	220V/50HZ	
Weight	180Kg	
Machine Size (LxWxH)	1800*700*1400mm	
Delivery Time	10-15 Days	
Type	Manufacture, Factory, Supplier	
Packaging	Wooden box	
Shipping Method	Sea,Air and Express	
Payment Term	L/C, T/T, Money Graml etc	

Our services:

In line with the principle of customer first, to provide customers with satisfactory after-sales service.

1. Pre - provide professional technical advice, to guide the reasonable selection of customers;
2. The use of labeling machines to provide training services, to guide customers to use and maintain the correct labeling machine;
3. To provide technical support services, to guide customers to solve the labeling machine related supporting services;
4. Equipment warranty for one year, after the warranty period, to provide maintenance services

Characteristics of Function:

Stable card sorting: advanced sorting - reverse thumbwheel technology is used for card sorting; the sorting rate is much higher than common card sorting mechanisms;

Speedy card sorting and labeling: for monitoring code labeling on drug cases, production speed can reach 200 articles/minute or above;

Wide application scope: support labeling on all kinds of cards, paper sheets, and unfolded cartons;

Stable labeling accuracy: coping wheel is used for smoothing work piece, stable delivery, warping removing and accurate labeling; the sophisticated design of adjustment part, the label rounding and optional six positions for labeling make product change and label rounding simple and time-saving;

Intelligent control Automatic photoelectric tracking that avoids idle labeling while correcting and detecting labels automatically, so as to prevent mislabeling and label waste;

High stability PLC+ touch screen + Panasonic Panasonic needle + Germany Matsushita Electric eye Leuze label consisting of senior electric eye control system, support equipment 7 x 24 hour operation;

Automatic shutdown: labeled bottles numbering, power saving (the device will automatically change into standby mode if no labeling is detected within a given time), indication of labeled bottles and protection of parameter setting (hierarchical authority to parameter setting) bring much convenience to production and management

Optional functions:

- Thermal code printing/spurting
- Automatic feeding function (according to the product)
- Automatic collecting function (according to the product)
- Circular circumferential positioning labeling function,
- Other functions (according to the customer's requirements).
