

## *DZP-400ST Soft Bag (Plastic Bottle) Intravenous IV Bag Pillow Packing Machine/Flow Wrapping Machine*

DZP-400ST soft bag (plastic bottle) large intravenous bag packing machine is mainly suit to outside package of soft bag and plastic bottle. Automatic labeling and coding can be available. It can carry out non-attended linkage production through combining the large transfusion production line, which reduces labor intensity, enhances production efficiency and improve automation degree.

### **Feature**

1. Double frequency inverter control with stepless variable speed.
2. Just in one step, the length of bag can be set and cut at any time without the need to adjust trail operation, and it it time saving and film saving.
3. It adopts international famous electric components, PLC control, friendly interface, with convenient and rapid setting of parameters.
4. The indication of fault is clear, and the function is more humanized.
5. Highly sensitive electric-eye color code tracking can make the sealing position be more accurate.
6. The accurate temperature setting is suitable for various of packaging material and improve the quality of seal.
7. It have functions of positioning power-off, without sticking to the blade and without waste of film.
8. Simple and clear driving system with more reliable work and more reliable work and more convenient maintenance.
9. The controls are operated on software, which facilitates the function regulation and technology upgrade so as to satisfy the production retirement.
10. It can be set the labeling device for automatic production.
11. The machine can be combined with the seft bag production line, not required manual adjustment.

## Specification

<b>Model:</b>	<b>DZP-400ST</b>
Packing capacity	30-230 packs/min
Packaging size (mm)	L(120-380)*W(30-180)*H(5-80)mm
Max. width of film	400mm
Power supply	AC220V 50Hz, 3KW
Weight	800kg
Overall dimension (L*W*H,mm)	4000*800*1550mm
