

ZF8P-2000 Automatic Paper Bag Packaging Line for Flour

The packaging machine can be equipped with different weight and filling system for various tiny granule and powder like wheat flour, yeast, food grade gelatin, feeds and chemical fertilizers etc.

Features

1. The machine completed the whole procedure of feeding, measuring, bag making, date printing, air charging(exhausting), outputting
2. Simple construction, reliable working, easy for maintenance.
3. Screw measuring controlled by servo motor, precision achieve $\pm 2\%$, independent mixing system.
4. The complete machine has good stability, convenient operation, low noise, high measuring speed, high precision, counting time's display.

Technical parameters

Model	ZF8P-2000
Product Type	powder
Capacity	20-25 Bags/min
Measuring Range	1-2kg
Packing Size	W:80-110mm L:250-350mm
Bag Type	stand up paper bag, kraft paper bag
Control	PLC Control, English&Chinese bilingual touching screen operation
Total Power	2.8Kw
Voltage	AC380V 50Hz (adjustable)
Bag Material	paper
Bag Film Width	Max 520mm
Grass Weight	5500kg
Overall Dimension	5500*4200*2750mm (L*W*H)
