

## JSJ-10B Capsule Counting Packing Machine

### Feature

1. This machine use for hard capsule to counting and bottling, particularly applicably to some pharmaceutical varieties less, yield less production scale using.
2. Mechanical bottling capsule's speed adjustable, bottling capsule's quantity can adjustable (Multiples of 10), convenient operation.

### Description

Used for bottle regularly into single line arrangement, continuous conveying to the continuity of the special equipment for bottle device. According to the production capacity of special equipment for stepless speed regulation, and make it match on production capacity, the equipment is reliable in performance and aesthetically pleasing, running stability.

### Technical Parameter

Model	JSJ-10B
Hole Number	10
Production capacity	600~900 bottle/ H
	20000 ~40000 pcs/H
Capsule Size	00#~5#
Power	220V, 50Hz, 1A,180W
Net weight	86kg
Dimension	1360×450×1530
