

UN-120LZH Automatic Vertical Cartoning Machine

Revolutionize Packaging with Our Automatic Vertical Cartoning Machine UN-120LZH

Description

Introduction and Features

Automatic Vertical Cartoning Machine: Versatile Packaging Solution for Diverse Industries

Designed to redefine efficiency in packaging, our Automatic Vertical Cartoning Machine stands at the forefront of innovation, catering to a wide spectrum of products—from coffee, salt, pasta, and washing powder to chocolates, pet food, penicillin bottles, perfume bottles, and beyond. Ideal for cosmetics, pharmaceutical, food, and agricultural chemical sectors, this machine transcends the limitations of horizontal cartoners, excelling in handling irregular bulk items with seamless precision.

Powered by a team of world-class designers, our cartoner integrates cutting-edge technology with innovative patents, ensuring unmatched performance. Its vertical design eliminates the constraints of traditional horizontal systems, making it a preferred choice for both domestic and international enterprises. The operational process—encompassing box opening, filling, sealing, and automatic waste rejection—operates with minimal downtime, optimizing production flow.

Inspired by German engineering principles, the machine features a spacious operational area, delivering superior stability and user-friendliness. It adheres to the strictest GMP standards for pharmaceutical manufacturing, with fully visible components that simplify adjustment, maintenance, and cleaning—essential for hygiene-sensitive industries.

Safety is embedded in its design: automatic overload and box misplacement detection systems trigger instant alarms and shutdowns, preventing damage and ensuring uninterrupted operation. Whether packaging delicate pharmaceutical vials or bulky consumer goods, this cartoner guarantees consistent, high-speed performance while reducing labor costs.

Join leading global brands that trust our vertical cartoning solution for its reliability, versatility, and compliance with international standards. Contact us today to explore how this technology can transform your packaging line and elevate production efficiency.

Main Specification

Models	UN-120LZH
Capacity	20-50 cartons/minute (accord to clients' box and products)
Carton Size	Min: 40×30×50mm
	Max: 120×120×300mm
Paper Quality of Carton	200-400g/m ³
Power	3 phase 220/380v 50/60hz 3.5kw
Air Supply	0.5-0.7 Mpa
Weight	800Kg
Dimension	2200mm×800×1500mm
