

## *RZ10-160E 12ZK Rotary Vacuum Packaging Machine*

The RZ10-160E 12ZK rotary vacuum packaging machine is a powerful and versatile tool for businesses looking to package their products with maximum efficiency and quality. This state-of-the-art machine features a range of advanced features that make it ideal for use in a wide range of industries and applications.

### **Description**

#### **Vacuum system of RZ10-160E 12ZK rotary vacuum packaging machine**

At the heart of the RZ10-160E 12ZK rotary vacuum packaging machine is a powerful vacuum system that can create a vacuum effect of up to 2mbar, ensuring that products are fully sealed and protected from air and moisture. With 12 vacuum chambers, The RZ10-160E 12ZK rotary vacuum packaging machine is capable of processing large volumes of products quickly and efficiently, making it a popular choice for manufacturers and processors in a variety of industries.

#### **Advantages of RZ10-160E 12ZK rotary vacuum packaging machine**

1. One of the key advantages of the RZ10-160E 12ZK rotary vacuum packaging machine is its ease of use and maintenance. The machine features a user-friendly touch screen interface that allows operators to easily control and adjust settings to meet their specific needs. The bag feeding mechanism is also optimized for improved performance and convenience, with a double fulcrum arm design that eliminates the need for a timing belt and ensures a stable, reliable feed.
2. Other advanced features of the RZ10-160E 12ZK rotary vacuum packaging machine include an automatic oil lubrication system that keeps the machine running smoothly and efficiently, as well as an independent closing function for each vacuum chamber that allows the machine to continue operating even if one of the chambers is malfunctioning. These improvements make the RZ10-160E 12ZK Rotary Vacuum Packaging Machine a durable and reliable choice for businesses seeking consistent, high-quality vacuum packaging.

Overall, the RZ10-160E 12ZK rotary vacuum packaging machine vacuum packaging machine is a top-of-the-line choice for businesses looking to streamline their packaging operations and improve product quality. With its advanced features, ease of use, and reliable performance, this machine is a valuable investment for businesses in a wide range of industries, from food and beverage to pharmaceuticals and beyond.

### Main Specification

Model	RZ10-160E 12ZK Rotary Vacuum Packaging Machine
Bag Size	W: 70-160 mm; L: 100-210 mm
Filling Range	≤ 400 g
Packing Speed	≤ 80 bags/min (depending on products and bags materials)
Weight	2600 kg
Dimensions (L*W*H)	2600 mm*1900 mm*1800 mm
Total power	7.37 kw (including vacuum pump)
Driving Power Source	380 V three-phase five line 50 HZ (other power can be customized)
Compress air requirement	≥ 0.4 m <sup>3</sup> /min (Compressed air is provided by the customer)
