

SJ-2B Counting Machine

This Machine adopts the internationally advanced vibrating channel, Oscillator variable frequency speed, PLC intelligent control of touch screen, optical fiber-sensitive head count, system self-inspection, fault indication alarm, automatic shutdown and other advanced technology. According to GMP standards, the body uses all stainless steel quality, which is a high-tech medical counting device integrated in the collective motor.

This machine belongs to the quasi desktop type counting device with reasonable design and compact structure. The machine is easy to operate and high-efficiency, which can be widely used in a variety of different shapes and size tablets, capsules, pills, transparent soft capsules and other drugs counting. The counting accuracy reach advanced levels in the world.

Technical Parameter

Speed	600-2000pcs/min
Application	Hard capsules, soft capsules, tablets, pills, etc.
Control device	Touch screen
Counting method	Infrared detection
Suitable size	Capsule model 00 # -5 #
	tablet diameter 5-25mm
Counting error	±0.3%
Voltage	220V/50-60Hz /100W
Weight (kg)	50kg
Overall dimension	735mmX580MMX720MM
Machine material	Material stainless steel 304 (0Cr18Ni9)
